**Presented By:** Sanjay Menon, Director of Business Development (Century Software), Mark Rees, Chief Technology Officer (Century Software)

**Registration:** [Century Financials Software - The Advantage For Informix Customers](#) [4]

## Description:

While IBM® Informix® is the database software voted #1 in customer satisfaction, clients choose Informix because it is reliable, low cost, and hassle free. Century Software is an IBM solution provider that choose to build our Century Financials, Enterprise Class, ERP suite on Informix for its best-of-breed embeddability, and it's performance. With one of the largest Informix user bases in the world, Century Financials is the most comprehensive Financial ERP solution designed and developed to utilize the power and functionality of the Informix relational database management system.

Leveraging an IBM validated architecture, Century Financials is implemented in over 110 enterprises, with over 100,000 customers using IBM's Informix database every day.

This chat will provide an overview of the Century Financials Suite and discuss how we have developed this world class Financial system on a world class RDBMS, Informix. As well we will discuss how Century Financials is developed on the Genero development platform and how our modular design helps our customer drive your business forward.

Here the presentation could be found prior to the event:
